

ACLS SQL v9.8.x — Release Notes

Bug Fixes, Enhancements & New Features

1. Mobile App

- For resources configured with customised fields, the Book button is now disabled in the mobile app.
- Users are prompted with a message advising them to complete the booking through the browser on desktop.

2. Booking Resource

- Fixed UI issues affecting the landing page after user login.

3. Resource Booking Invoice

- Resolved SQL data type issues in the invoice module.

4. Resource Group

- Added total resource quantity per group to the resource group table.

5. Booking Report

- Added group booking type to all booking reports.
- Fixed the export issue in the resource period report.

6. User Self-Managed Profile

- Introduced a new self-managed profile feature.
- Users can now update their details via My Profile.
- Added support for mandatory profile updates upon login at predefined intervals, such as every 12 months.
- Account update enabler: advance feature for user self-managed “billing” account update

7. Induction Module

- Added Start Induction to the My Induction Process page.

Update Type of Researcher	Industry (AUS) <small>(Do not change type of researcher if the current works for you)</small>
Update School/Org	School of Biological Sciences <small>(Do not change school/org if the current works for you)</small>
Update Supervisor	Choose supervisor from the list <small>(Do not change supervisor if the current works for you)</small>

Please verify your details before submitting. You are responsible for the accuracy of the information provided.

8. MoxyTap Manager

- Implemented UI improvements.
- Enhanced Tap & Go functionality with:
 - training certificate checking
 - account/project selection

9. STATS Deployment

- Integrated ACLS with the ACLS-PLUS Consulting Calendar Module to support STATS operational requirements.

10. CMCA Deployment

- Fixed a glitch in the walk-up booking data upload feature.

11. RIMS Deployment

- Implemented changes to the research repository to meet RIMS requirements.
